PAPIER MACHE AND CARTON PIERRE ENRICHMENTS MANUFACTORY,
49 & 50, RATHBONE-PLACE.

GEORGE JACKSON AND SONS

Beg the attention of Architects, Builders, Decorators, and others, to their large assortment of ENRICHMENTS in every style, executed in the highest class of art. Enrichments for ceilings of every period, elaborate or simple, Gothic, Elizabethan, pendentive or flat, Louis XIV., in much variety, and to any degree of cost; Italian and Greek, Renaissance, and many modified characters, executed for the first houses and from designs of architects of the highest eminence; wall dressings, rich friezes of every period, rich Elizabethan and Gothic Dados, in many designs. Door-cases, mouldings, and dressings.

A large assortment of Gothic Bosses to many varieties of all sizes, tracery and panel headings for church works, organ dressings, of most periods, and faithfully executed to the traits of each. The general decorations of Drawing and Dining Rooms, Libraries, &c. of very considerable extent, as furniture, glass frames, tables, window cornices, screens, candelabra, and the whole range of accessaments to reception rooms of the first class as well as more subdued.

The facilities for and repeated enlargement of premises enable GEORGE JACKSON and SONS to announce the execution of works of the above descriptions in these advantageous materials at a cost considerably below any known method, while for quality, relief, and finish, they flatter themselves they stand unrivalled.

TO ARCHITECTS, BUILDERS, &c.

ALL descriptions of TERRA COTTA, CEMENT, and PLASTER CASTINGS, executed in first-rate manner, on reasonable terms, by J. HERBERT and SON, Modellers, &c. 61, Parker-street, Drury-lane. A splendid assortment of Corinthian, Ionic, and other Capitals; Centre Flowers, Balusters, Trusses, &c.; Elizabethan and other Chimney Shafts.

PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SON, Patentees, Nine Elms, London.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sheppy Stone, but is much better adapted to engineering works, from the rapidity with which it sets and hardens under water. It has been long used at the great Breakwater at Portbourg; in a similar work at Alderney; and at Dover New Pier, to unite the masonry. The foundation of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and sea shingle. The work extends 300 feet into the sea, and is exposed to the most violent gales of the Channel, in a position where every former construction had been repeatedly washed away. The inconveniences of the varied qualities of Roman Cement are superseded by this improved manufacture.

CHAS. FRANCIS and SON, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.

Agent for Southampton, H. L. PLUDER, American Wharf.

PORTLAND CEMENT, in Casks of Four Imperial bushels. QUANTITY NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

PORTLAND CEMENT.—THOMAS FREEN and CO. having completed their works at WOULDHAM-ON-THE-MEDWAY for the manufacture of PORTLAND CEMENT, beg to inform their friends and the public that they are now ready to supply them with cement of superior quality on reasonable terms.—Roman Cement and Plaster of Paris Works, Tunnel Wharf, Canal-road, Kingsland-road.

PORTLAND CEMENT.—JAMES WESTON, having commenced manufacturing the above Cement, begs to inform the trade in general that he can supply them with any quantity they may require, either at his Works Mill-wall, Poplar; St. Andrew's Wharf, Earl-street, Blackfriars; or Middle Scotland-yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, French and English Plaster, &c.

PORTLAND CEMENT.—The difficulty of procuring this valuable Cement of uniform colour and strength has hitherto prevented its more general use. Contractors and Builders will find that these two important qualities may be depended on with the greatest certainty in that manufactured by CHARLES J. HILTON, at his Roman and Portland Cement and Plaster of Paris Works, Faversham, Kent, at which place, as also at his Wharfs in London, 6, Upper Thames-street, City, and Great Scotland-yard, Westminster, orders can now be received to any extent.

6, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality in deeidratum never before attained in Portland Cements. It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack; combined with which its eminent hydraulic properties stamp it at once as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by R. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PORTLAND CEMENT WORKS, NORTHFLEET, KENT.—Messrs. ROBINS and CO. solicit the attention of their friends and the public to their superior Cement, confident that the great improvement in the manufacture thereof during the present year will insure to them a continuance of that patronage with which they have so long been favoured.—Orders received at the Works, and at Great Scotland-yard, Whitehall.

Great Scotland-yard, Whitehall.

NOTICE.—PATENT PORTLAND CEMENT. The CO-PARTNERSHIP lately subsisting between ROBINS, ASPDIN, and COX, having been DISSOLVED on the 7th day of November last, by a decree of his Honour the Vice-Chancellor Turner, and an injunction granted, restraining the William Aspdins, then of Ormes House, Northfleet, Kent, from intermeddling with, or receiving or disposing of any of the moneys, property, or assets of the said late partnership, and from using or pleading the name thereof for any purpose whatsoever, Messrs. ROBINS and COX, being alone authorized to wind up the affairs of the late Co-partnership, request the Creditors of the late Firm forthwith to render their accounts that the same may be discharged; and the Debtors to the late firm will be pleased, at their convenience, to pay their accounts, either at the Cement Works, Northfleet, Kent, or at Great Scotland-yard, Whitehall, where Messrs. ROBINS and COX continue to carry on their Manufacture and Trade in Portland Cement, in connection with Messrs. Goodwin and Schmidt, under the style or firm of ROBINS and COMPANY.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster; and Seel-street, Liverpool.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal use.—These well known hard stuccoes dry quickly, and can be painted upon within a few days. Made and sold by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster.

PORTLAND CEMENT is the cheapest, because the best Cement for external use. As a stucco, it requires no colouring, does not vegetate, and is not affected by frost. As a mortar for brickwork, it may be mixed with three to four parts of sand; and, for concrete, it will carry ten to twelve times its volume of sand and gravel.—Manufactured by JOHN BAZLEY WHITE and SONS, 17, Millbank-street, Westminster, and Seel-street, Liverpool.

WILLIAM ASPDIN'S PATENT PORTLAND CEMENT.—Messrs. ASPDIN, ORD, and Co. have much pleasure in informing consumers of this valuable Cement that as their works are now in operation they are prepared to execute any orders they may be favoured with.

New Wharf, Abingdon-street, Westminster, Sept. 21, 1852.

ROMAN and OTHER CEMENTS, Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT; also Tarras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses &c.

Manufactory, Mill Wall, Poplar; Depôts, Commercial-road, Lambeth; and Paddington-basin.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOHNS and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing every advantage over the common Lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other.—DOES NOT WASH OFF.—Is perfectly dry in twenty-four hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One coat will cover 250 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external surfaces, places it above all other materials of its kind; it has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained on application to the Sole Agents, PHILIP HARK and Co. at the Warehouse, 32, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

POZZOLANA from the Mine of St. Paul, at Rome.—Contractors, Builders, and others constructing or repairing docks, quays, wells, foundations of houses, or other works where the object is to prevent the filtration of water, are strongly recommended to use POZZOLANA, which is the only Cement that guarantees perfect and durable solidity in hydraulic works. Mortar, made of Lime and Pozzolana, is also particularly recommended in building houses. The walls are then impervious to damp. When common mortar is used the damp of the atmosphere in rainy weather attracts the saline particles in the sand, which evaporating produce a moisture in the interior of the houses, injurious alike to the furniture and to the health of the inhabitants. Whole cargoes of Pozzolana delivered at any port of the United Kingdom on very moderate terms, and large or small quantities in London.—Apply to A. BINDER PELLEGRINI and CO. merchants, 113, Fenchurch-street, London.

GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors, of the above, is its best recommendation.

Glebe, Campine, and Cole's Blue Vitrified Bricks. Pipes, Junctions, Bends, and Pipe Doubles.

ROMAN, PORTLAND, PARIAN, ANSTON, and LIAS Cements of the best quality.

SECONDS, PAVIORS', STOCKS, and other Bricks.

CHARLES RICHARDSON, 6, South Wharf, Paddington.

THE BEST MATTING and MATS, of Cocoanut Fibre.—The Jury of Class 38, Great Exhibition, awarded the Prize Medal to T. TRELOAR, Cocoa-nut Fibre Manufacturer, 42, Ludgate-hill, London.

TARPAULINS FOR COVERING ROOFS during Repairs, SCAFFOLD CORD and every description of ROPE used by Builders upon the lowest terms. Marquees and temporary Awnings on sale or hire. Orders per post receive the most prompt attention.—WILLIAM PIGGOTT, 115, Fore-street, City, Manufacturer, by appointment, to her Majesty's Honourable Board of Ordnance.

STAINING DEAL TO IMITATE ALL KINDS of WOODS. It requires NO SIZING, and will stand the exposure to the weather. Price 6s. per gallon. Varnisher for W. NAYLOR'S Stains may be had at the Factory, 87, James-street, Oxford-street.

STEPHENS'S LIQUID OAK, MAHOGANY, and SATIN WOOD STAINS, for staining various sorts of Inferior Woods, so as to give them the appearance and character of the more costly and ornamental kinds. In the BUILDING and DECORATING CHURCHES, where it is desirable to give to the cheaper kind of woods the appearance of antique Oak, or to make Deal assume the character of Oak Panelling, whereby the effect of the more costly may be produced by the use of a cheaper material, these stains will be found more effective than any means hitherto employed. For the exposed Timbers of the inside of the Roofs of Churches, by brushing them over with the Stain, which operation is very rapidly, and of course economically effected, the appearance of an oaken roof will be produced. For colouring the backs of the seats, pews, the fronts of galleries, the pulpit, &c. it is equally advantageous. Prepared by HENRY STEPHENS, and may be obtained at 54, Stamford-street, and at the Office of "The Builder," at both which places may be had the proper Varnish and Size, with directions for use.
